

IPification, One-Click Mobile Authentication Now Available on Telkomsel, the Largest Indonesian Telecom

June 28, 2022 – Hong Kong

The largest mobile network operator in Indonesia, Telkomsel, is partnering with IPification, the global leading provider of mobile network-based authentication, user verification, and fraud prevention solutions. With this integration, Telkomsel is improving the security of digital data, as well as providing mobile app developers in the region with the chance to implement a top-notch and seamless user verification option.

As the leading provider of telecommunications in Indonesia, Telkomsel is on a mission of implementing customer-centric innovations to develop a sustainable and inclusive digital ecosystem. Complimentary in its mission, IPification was the perfect match.

IPification, part of Benefit Vantage Limited, is the provider of mobile identity solutions that are secure, seamless and protect user privacy.

“I am very proud to announce that a company as big as Telkomsel is joining the IPification camp of user-centric

mobile identity experiences. With this partnership, Telkomsel is enabling over 150M of their subscribers to gain access to frictionless, yet bank-grade secure mobile authentication, and user verification solutions.”

— Stefan Kostic, IPification CEO

Now that Telkomsel has partnered with IPification, mobile app developers in the country can start implementing IPification one-click user and phone verification into their apps to streamline onboarding and login processes thus helping improve their user acquisition, retention and engagement rates.

“We also express our appreciation for the trust that has been given by Benefit Vantage Limited to the digital security solutions presented by Telkomsel. Hopefully this strategic collaboration can have a positive impact on creating civilized digital security for all levels of society.”

— Hanang Setiohargo, VP Enterprise Business Management

About IPification

IPification is building the backbone of mobile authentication of today and tomorrow. By verifying the device, SIM & phone number via IP address, IPification patented technology is enabling secure, passwordless, zero-tap compatible mobile user authentication, registration, transaction approval and fraud prevention solutions for any mobile application. Readily available across numerous countries and regions, IPification is trusted by some of the leading telco, technology, payment, and OTT companies including ABA Bank, GBG, T-Mobile Montenegro, 3HongKong, Axiata Digital, Swisscom, Indosat Ooredoo.

IPification Powered by GMID (trading as IPification) is a trademark of Benefit Vantage Limited.
